INTRODUCTION

This volume of the Census of the Prairie Provinces presents statistics of agriculture as compiled from data obtained in the Census as of June 1, 1946.

Preliminary bulletins have been released which gave data from the Census as it became available. This report contains all the revisions which have been made since the release of these preliminary bulletins and age final figures. The tables have been prepared in four sections: (a) comparative tables, (b) detailed tables by census division, (c) detailed tables by census subdivisions, (d) cross-classifications,

Années à laquelle les chiffres du recensement s'appliquent - La statistique des fermes, des exploitants de fermes, de la population agricole, de la superficie des fermes, du nombre de bestiaux, de la machinerie agricole, de la valeur et de la dette des fermes s'arrête au ler min 1946. Les données sur la main-d'oeuvre engagée, sur les dépenses et les revenus des fermes, sur la facon dont il a été disposé des bestiaux et le rendement des cultures, sur les produits animaux et forestiers portent sur la période du ler juin 1945 au 31 mai 1946. Les chiffres sur la production courante, les dépenses et les revenus pour la période de douze mois précédant immédiatement la date du recensement sont une dérogation à la pratique suivie lors des recensements antérieurs et qui établisseit ces renseignements pour l'année rieurs et qui exacussant ces rensemments pour a mance civile précédente. Cette nouvelle pratique a pour objet d'éviter les inexactitudes dues à un défaut de mémoire qui pourraient se glisser dans les renseignements obtenus pour une période antérieure à la date du recensement. Les questions relatives aux travailleurs agricoles portent sur ceux qui étaient employés durant la semaine terminée le 1er min 1946.

Méthode de recensement. - Les trois provinces des Prairies sont divisées en districts de recensement our corresnondent aussi étroitement que possible aux districts électoraux fédéraux. Chaque district a été confié à la surveillance générale d'un commissaire du recensement. Ces districts ont été subdivisés en sous-districts ou arrondissements de recensement. Il y a, au recensement de 1946, 4,270 de ces arrondissements dont 3,219 contiennent des fermes. Un agent recenseur a été nommé pour chaque arrondissement. Il avait pour mission de visiter toutes les fermes de son district et d'obtenir les renseignements exigés sur les formules du cultivateur lui-même ou de quelqu'autre membre responsable de son menage. Les questionnaires ont été vérifiés par le commissaire du recensement avant d'être envoyés au Bureau fédéral de la statistique où ils ont été compilés par un personnel spécialisé avant que les chiffres scient calculés. La Royale Gendarmerie à cheval du Canada a collaboré au recensement dans les régions septentrionales non organisées et les réserves indiennes ont été recensées par les azents

Questionnaire — Le questionnaire agricole sérient contensait 427 questionnaire suite de la leur les enneaignements suivants au solet de chaque forme des provinces des Pruiries (a) dondéer entétue se l'exploitant, la population, la agercial de la leur des macaliseries agricole, la delte des fennes et les bestiux au les fermes le 1 eu jun 1946; (b) a superficie des grandes cultures sendes ou plantées pour la noisean de 1955; (c) les la sensaire terminée le let jun 1946; (d) les dépenses de la la sensaire terminée le let jun 1946; (d) les dépenses de quantity and value of farm products sold or consumed by the household on the farm, the amount of work done and the income from outside sources, and the weeks of hired labour, for the period June 1, 1945, to Jun 31, 1946.

There was also a schedule for the enumeration of animals and agracultural production found on plots of less than one acre or on larger plots which did not fully conform to the ceasus definition of a farm. These plots may be located in either urban or rural areas, and are assinty records of home gardens and animals. The results of the compilations of data enumerated on this schedule are given in Table 20.

Lemes "habitées" et fermes "inhabitées". - Lors du recensement, il a été constaté que dans certains cas une ferme était située dans deux ou plusieurs arrondissements de recensement. Dans de tels cas, la partie située dans chaque arrondissement du recensement était recensée comme une ferme séparée. La partie située dans l'arrondissement habité par le fermier était désignée comme ferme "habitée" et celle qui était située en debors de cet arrondissement, comme ferme "inhabitée". Dans la majorité des cas, ces fermes "inhabitées" sont des parties d'autres fermes plutôt que des fermes distinctes. Aux deux recensements de 1946 et de 1941, les fermes "habitées" et les fermes "inhabitées" situées dans la même municipalité ou la même subdivision ont été réunies en une ferme unique, de sorte que le nombre de fermes occupées déclaré à ces deux recensements devient comparable. Toutefois, aux recensements de 1936 et anté-rieurs, les fermes "habitées" et les fermes "inhabitées" étaient traitées comme des fermes séparées, ce dont il faut tenir compte dans la comparaison du nombre de fermes occupées d'un recensement à l'autre. Cette différence ne se rencontre naturellement que dans le nombre de fermes et non dans leur superficie.

Fermes "propriété entière". - La propriété entière veut dire que l'exploitant détient le titre ou acte notarié de toute la terre qu'il exploite.

Fermes "particilement possédées et louées". — Cette expression s'applique aux cas où l'exploitant ne possède qu'une partie seelement de la terre qu'il exploite et loue ou prend à bail le resire.

Exploitant de ferme. — Cette expression est employée dans le recensement pour désigner la personne directement responsable des travaux agracoles de la ferme en qualité de propriétaire, locataire, métaver ou gérant engagé.

Work off the Farm and Outside Income, - Information was obtained for the period June 1, 1945, to May 31, 1946, on the following subjects: (a) number of days of non-farm work performed by the farm operator for wages, whether in cash or kind (including work done for the municipality in payment for taxes or to pay off a debt), (b) number of days of farm work performed by the operator off the farm for wages, (c) the occupation followed by the operator when doing non-farm work, (d) the net receipts for nonfarm work, (e) gross receipts for farm work performed off the farm whether received by the operator himself or by or machinery belonging to the operator's farm (labour evof machinery bronging to the operator's fain (accourse, changed with neighbours such as is commonly practised in many localities, and earnings of family members working in many localities, and cornings of mainty measures working permanently off the farm, are not included), (f) gross returns from boarders. lodgers, over-night cabins, etc., (g) amount received from the sale of coal, sand or gravel, (h) income from other sources, such as the amount received as insurance for fire and hall damage, sale of farm machinery, exhibition prizes, etc.

Fann Population. - Each farm operator was asked to state the total number of persons living on the farm on June 1, 1946, as well as the number of males and females under 14 years of age and those 14 years of age and over

Enumerators were instructed to include with the farm population members of the household on Active Service or at camp with a Reserve Army Unit.

In the case of institutional famms, only those members of the institution who directed or actually performed agricultural operations were included. In the institution of farm population by subdivision (Table 38), persons living on farms that were located in cities, towns or villages were included with those of the adjoiring subdivision.

It often happens that the terms "farm population" and "reral population" are used synonymously. For census purposes, the rural population was that part of the population which resided outside the boundaries of incorporated cities, towns or villages, while the farm oppulation was that part of the population which lived on farms, regardless of where the farms were located.

Fam workers. "This term refers to the number of persons working on the fren, exclusive of housework, during the week ending June 1, 1946. It includes (a) members of the week ending June 1, 1946. It includes (a) members of the properties of the pr

Travail en dehors de la ferme et revenu de l'extérieur. --Ces reuseignements ont été obtenus nour la période du ler jum 1945 au 31 mai 1946 et portent sur les sujets sujvints; (a) nombre de jours de travail non agricole exécuté par l'exploitant contre rémunération (en espèces ou en nature, compris le travail pour le compte de la municipalité en palement de taxes ou pour acquitter une dette), (b) nombre de jours de travail agricole exécuté par l'exploitant hors de la contre rémunération, (c) occupation de l'exploitant quand il fast du travail non agricole, (d) revenu net découlant du travail non agricole, (e) revenu brut du travail agricole exécuté hors de la ferme recu par le propriétaire lui-même ou par ses engagés ou les membres de sa famille utilisant les chevaux ou la machinerie appartenant à la ferire de l'exploitant (le travail échangé avec les voisins, comme la chose se pratique dons plusieurs endmits, et le cain des membres de la farulle qui travaillent en permanence hors de la ferme ne sont pas inclus), (f) revenu brut provenant de pensionnaires, logeurs, chalets, etc., (g) montant reçu de la vente de churn, de sable ou de gravier, (h) revenu d'autres sources, telles que sommes d'assurance reçues à la suite de dommages causés par l'incendie et la grêle, revenu de la vente de machinerie agricole, prix gagnés aux expositions, etc.

Population agricole.— Il a été demandé à chaque exploitant de ferme de déclarer le nombre de personnes qui vivaient sur la ferme le ler juin 1946, de même que le nombre de personnes du sexe masculin et du sexe féminin âgées de mons de 14 ans et de 14 ans et plus.

Les agents recenseurs avaient reçu instruction d'inclure parmi la population agricole les membres du ménage en service actif ou au camp militaire avec une unité de l'armée de réserve.

Dans le cas des femes d'institution, seuls les membres de l'institution qui les dirigeatent ou y accomplissaient effectivement du travail agricole oni été inclus. Dans le calcul de la population agricole par subdivision (tableau 38), les personnes qui vivaient sur des femes suitées dans les cités, villes ou villages ont été incluses avec celles de la subdivision adjacente.

Value of Field Crops, - The value of field crops produced in 1945 was not enumerated in the 1946 Census but was computed from prices supplied by the Agricultural Division of the Bureau of Statistics. These prices were derived from data sent in by price correspondents and represent the average prices received by famoers for their field crops. Except for wheat, the unit values used are revised figures which include government subsidies and final payments where applicable. In the case of wheat, final payments where applicable, in the table of wheat, the price used was the average initial price received by the farmer during the period June 1, 1945, to May 31, 1946, and does not include subscenent participation payments by the Canadian Wheat Board, As of April 1, 1949, three additional wheat navments have been made, the first home 10 cents per bushel, and the second and third adjustments 20 cents per bushel. It should be observed that the value of field crop production does not represent cash income from sales since several of the crops such as oats for hay, com for fodder, etc., are almost wholly consumed on the farms on which they are grown,

Information on debts covered by liens was obtained from all occupied farms regardless of tenure and covers liens on crops, live stock and implements.

Valent des grandes cultures. - La valeur des grandes cultures produites en 1946 n'a pas été relevée lors du recensement de 1946, mais elle a été calculée d'aprés les prix fournis par la Division de l'agriculture du Burgau de la statistique. Ces prix sont tirés des données envoyées par les correspondants sur les prix et représentent les prix moyens recus par les cultivateurs pour leurs produits de grande culture. Sauf pour le blé, les valeurs unitaires employées sont des chiffres revisés qui comprennent les subvens'appliquent. Dans le cas du blé, le prix employé est le prix moven initial recu par le cultivateur durant la période du ler min 1945 an 31 mai 1946 et ne comprend pas les paiements subséquents de participation effectués par la Commission canadienne du blé. A compter du 1er avril 1949, trois paiements supplémentaires ont été faits sur le blé, le premier. de 10 cents le boisseau et le deuxième et le troisième, de 26 cents chacun. Il convient d'observer que la valeur du rendement des grandes cultures ne représente pas le revenu monétaire dérivé des ventes parce que diverses récoltes telles que l'avoine pour le foin, le mais fourrager, etc., sont à neu près entièrement consommées sur la ferme où elles sont produites.

DESCRIPTIONS OF CENSUS DIVISIONS

There being no fixed political divisions in hanitons, Saskatchewan or Alberta corresponding no counties of Eastern Canada, these provinces have been divided for satisficial purposes into consus divisions and substitutions. These census divisions have been so laid out that as population increases, they may be subdivided without destroying the menns of comparing the variations in possible on and paricularing disclosed by required.

The reason for using areas with fixed boundaries rather than electonal districts as a basis for the compilation of the census is that the electonal districts being liable to hive their areas changed after each redistribution make it impossible to compare one census with another for areas smaller than a province.

The census divisions of the province of Saskatchewan are constituted as follows:

La raison de l'empioi de régions à limites déterminées de préférence aux districts électoraux comme base de compilation de recensement, est que les districts électoraux sont susceptibles de remanlement après chaque redistribution et qu'il est impossible d'établir des companzisons d'un recensement à l'autre pour des régions moins considérables qu'inne morifice.
